

America's Tax Code Isn't Working

With a 35% business tax rate - the highest among the OECD nations - U.S. businesses of all sizes are suffering.

Global companies have left the U.S.

Small businesses are being forced to close due to regulatory & tax burdens.

America is falling behind.

A 25% tax rate – average among OECD countries – would have kept 1,300 companies in the U.S. over the last 10 years.

We urgently need to fix the tax code to keep America prosperous.

Congress, Get to Work!
