RE: Survey of n500 Likely General Election Voters in Oklahoma

Opposition to Oklahoma ending statewide vaccine requirements is strong

- **Two-thirds (67%) of voters oppose Oklahoma adopting a policy to eliminate all statewide vaccine requirements, including 57% who strongly oppose - just 21% support.**

- **78% of parents would likely continue vaccinating their children against diseases such as polio, measles, mumps, and rubella if Oklahoma were to eliminate all school entry requirements for childhood vaccines.**

Voters trust vaccines and believe the benefits outweigh any potential risks

- Two-thirds of voters believe **childhood vaccines provide significant benefits and are essential** – more than double the number who believe **vaccines may offer some benefits but are concerned about potential risks** and side effects (27%).
- Voters believe the **benefits outweigh the risks** most with **MMR vaccine (73%)**, **polio vaccine (71%)**, **DTaP vaccine (68%)**, and the **chickenpox vaccine (61%)**.

State legislators' stance on the issue has a powerful impact

- **70% of voters would be less likely to support their state legislator if he or she supported plans to end all vaccine requirements statewide in Oklahoma.** 61% would be *much* less likely.
 - This includes a majority of Republicans (58%).

Voters show strong consensus on access to vaccines

- Voters show strong support for:
 - Policies that **ensure vaccines are easily available** at local pharmacies and fully covered by insurance (89% support).
 - Efforts to **increase access and insurance coverage for vaccines** so that all children can meet school vaccination requirements (86% support).
- There is near-universal agreement that:
 - The process for **approving vaccines should be grounded in scientific evidence** and designed to support innovation that protects individuals and families (86% agree).
 - Vaccine recommendations **should be guided by physicians, scientists, and public health experts** trained to evaluate vaccine risks and benefits (80% agree).

Methodology: This probabilistic survey was conducted September 26 – 27, 2025, with 500 likely general election voters. It has a margin of error of $\pm 4.37\%$. Known registered voters were interviewed via online panel and SMS. This survey was weighted to a likely general election voter universe.

Cygnal is an award-winning international polling, public opinion, and predictive analytics firm that pioneered multi-mode polling, text-to-web collection, and emotive analysis. Cygnal is ranked as the most accurate firm, and clients rely on Cygnal's ability to create intelligence for action.
